## OBJECTIVE

---

Enthusiastic and dedicated Computer Science graduate currently undergoing comprehensive training in a full-stack development bootcamp. Eager to apply theoretical knowledge gained from my degree alongside practical skills acquired during the bootcamp to contribute effectively to a dynamic software development team. Seeking opportunities to further refine my coding abilities, collaborate with peers, and tackle real-world challenges in the tech industry.

## EDUCATION

---

**Bachelor of Computer Science**, Eastern Connecticut State University 2018 - 2023

## SKILLS

---

**Technical Skills** HTML, CSS, JavaScript, Git, GitHub

**Soft Skills** Problem-solving, Adaptability, Attention to detail, Continuous learning

## EXPERIENCE

---

**Full-Stack Development Bootcamp** Jan 2024 - July 2024  
University of Connecticut *Connecticut*

- Covering an intensive full-stack development bootcamp, covering front-end and back-end technologies, including JavaScript, React.js, Node.js, and MongoDB.
- Developed multiple full-stack web applications from concept to deployment, incorporating responsive design principles and user authentication features.
- Will receive a certification in full-stack development upon successful completion of the bootcamp.

**Server/Bartender** May 2020 - Current  
Belle Haven Club *Greenwich, CT*

- Multitasking: demonstrate the ability to handle multiple tasks and projects concurrently.
- Teamwork: Collaborating with coworkers to ensure smooth operations and supporting each other during busy shifts demonstrates the ability to work effectively in a team.
- Attention to Detail: Ensuring accuracy in orders, maintaining cleanliness, and adhering to company standards highlight attention to detail.

## PROJECTS

---

### [GitHub](#)

**Personal Website portfolio.** A collection of my projects, showcasing my proficiency in web development using HTML and CSS. It serves as a platform to display my skills, experience, and creativity to potential employers, clients, and collaborators. ([Try it here](#))

**Weather App.** The Weather App - City Search is a web application built using HTML, CSS, and JavaScript that allows users to search for the current weather conditions of any city using an API. It provides users with real-time weather information, including temperature, weather description, humidity, wind speed, and more, for the specified city. ([Try it here](#))

**Password Generator.** robust password generator web application developed using JavaScript, with a sleek and user-friendly interface designed using CSS and HTML. It empowers users to create highly secure and customizable passwords for their online accounts with ease. ([Try it here](#))
